BBC attempts to make the classic card game more appealing to the 21st century Now, you can download a 20-year-old classic card game, "Azul vs. Criolla," for the first time on iOS and Android. The game itself is not new, as it was previously released for the Atari 2600 in and was also made available for download on the N64 and Playstation 1, but the availability of the games on mobile devices is something new. The application, which has free and paid versions, was developed by independent developer Agudo Ingenieros. According to Agudo Ingenieros, "Azul vs. Criolla" is a classic card game with a fast-paced and strategic fight against 12 other players. The game uses both colors of cards, the suit and the number, and also features innovative game mechanics such as the hidden character rules and special rule for dealing card effects, as well as the ability to change the entire hand every round. Agudo Ingenieros also said that the game is completely free, and the only way to unlock certain features is by purchasing the app or purchasing credits through the in-app purchase system. The present invention relates generally to an image-sensing apparatus and particularly to an image sensing apparatus for use in a camera, e.g. 82157476af
